2. Chief, Building Planning Staff (BPS) presented an overview of the Agency's Master Plan including a history of previous efforts of consolidation, a description of the most recent plan, National Capital Planning Commission review process, traffic impact, and the proposed development of the Scattergood-Thorne property. Sight line studies and model photographs were displayed, and one copy of the Environmental Assessment was given to the Association.

3. It was agreed that the Agency will present a similar briefing to the Association on Wednesday evening, 2 December 1981, at the McLean Community Center. In the discussions with this group, it became clear that they were in close contact with county reviewing officials and quite current on traffic issues. Since it appears that traffic impact may be a major concern, JHK & Associates, who did the traffic analysis for the Master Plan, will be asked to attend and respond to any questions on traffic projections.

4. Following the meeting, the group was given a brief tour of the building and the site of the proposed new building.
